Call for Papers

Special Session: **Network Security & Cryptography**

Session Chair: PrateekThakral, JUIT Solan, Himachal Pradesh

Co-Session Chair: Prantik Biswas, IIIT Noida, UP

E-mail: 18.prateek@gmail.com

Mobile: 8083000073

Details of Proposed Session

Network security consists of the policies and practices adopted to prevent and monitor unauthorized access, misuse, modification, or denial of a computer network and network-accessible resources. Network security involves the authorization of access to data in a network, which is controlled by the network administrator. Users choose or are assigned an ID and password or other authenticating information that allows them access to information and programs within their authority. Network security covers a variety of computer networks, both public and private, that are used in everyday jobs; conducting transactions and communications among businesses, government agencies and individuals. Networks can be private, such as within a company, and others, which might be open to public access. Network security is involved in organizations, enterprises, and other types of institutions.

This special session presents original research and technological development for addressing real and complex issues related to society and technology.

A research area for this special session includes but not limited to:

- 1 Network Security
- 2 Cryptography
- 3 Steganography
- 4 Intrusion Detection
- 5 System Security
- 6 Malware Detection
7. Cyberwarfare
8. Mobile Secure Gateway
